AVI DER MAJOR REPAIRS

Switch & Save.

Parts Manufacturer Approval (PMA) is an authorization granted by the FAA/EASA to a manufacturer of aircraft parts.

PMA parts must pass the same rigorous quality and testing requirements as OEM parts. The PMA program allows Aviation Inflatables to manufacture sub-component parts instead of relying on the after market or the more expensive OEM alternative.

✓ AVAILABILITY GUARANTEED.

OEM parts have longer lead times, that can extend over 90 days. PMA's are a comparable solution for a quick turn around with guaranteed quality.

✓ ALWAYS RELIABLE.

Every PMA part manufactured is required to follow FAA guidelines and qualifications in order to ensure that the specs and quality of materials are up to the industry standard.

PMA Availability

● PMA Types Available

- Cylinders & Reservoirs
- Portability Stud
- Life Vest Bag

● Type of Cylinders

- Steel
- Kevlar
- Aluminum Lined Carbon & Fiberglass Reinforced

● Cylinder Rating

- 3HT certified
- Special Permit
